COATING & PAINT CURING OVENS

Lacquer Curing Oven

Oven for drying and curing lacquers on metal, wood and plastic parts.

TEMPERATURE
Up to 200°C

HEATING
Electric, gas (LPG/PNG/CNG) or dual fuel (electric + gas)

INDUSTRIES
Furniture, hardware, cans

Specifications

Working temperature	50°C to 200°C
Typical stoving	10 to 20 minutes at 120°C to 200°C
Film type	clear and tinted lacquers
Loading	racks, hangers or conveyor
Heating	electric or indirect gas

Features

- Even temperature to prevent yellowing
- Gentle airflow that does not mark the film
- Filtered air for a clear, dust-free finish
- Racks or hangers that touch hidden faces only
- Exhaust matched to the solvent load

Applications

- Brass hardware and fittings
- Lighting and decorative metalware
- Cans, closures and tinplate
- Wooden and plastic components
- Plated and polished parts
