SPECIAL EQUIPMENT

Shrink Packaging Machine

Electric conveyor shrink tunnel that wraps products tight in PVC or polyolefin film, up to 300°C.

TEMPERATURE
Up to 300°C

HEATING
Electric

INDUSTRIES
Packaging, utensils and cookware, welding electrodes, FMCG

Specifications

Type	electric conveyor shrink tunnel
Maximum temperature	300°C
Conveyor width	600 mm or 750 mm
Heating zone	1,500–1,800 mm
Cooling zone	750–1,000 mm
Heating	18–21 kW electric
Drive	1 HP VFD, variable speed
Film	PVC or polyolefin (POF) shrink film
Warranty	one year on manufacturing defects (elements and consumables excluded)

Features

- Even shrink on top and sides of the pack
- Cooling zone sets the film before exit
- VFD speed control for different films and packs
- Compact electric design
- Unloading table option
- Standard 600 mm and 750 mm widths

Applications

- Shrink wrapping utensil sets and cookware
- Packing boxes and cartons
- Multipacks of bottles and jars
- Packing welding electrode packets and cartons
- Dust-proof packing of spare parts
