COATING & PAINT CURING OVENS

Varnish Drying Oven

Oven for drying varnish films on parts and panels evenly without bubbles or runs.

TEMPERATURE
Up to 200°C

HEATING
Electric, gas (LPG/PNG/CNG) or dual fuel (electric + gas)

INDUSTRIES
Wood, metal finishing

Specifications

Working temperature	40°C to 200°C
Cycle	gradual ramp, then hold
Airflow	uniform, low velocity
Loading	racks, trays or trolleys
Heating	electric, steam or indirect gas

Features

- Gradual heat-up to let the film level
- Level racks and shelves to prevent runs
- Low, uniform air speed across the panels
- Continuous solvent exhaust
- Filtered fresh air make-up

Applications

- Varnished metal panels and nameplates
- Wooden components and mouldings
- Printed sheets with over-varnish
- Musical instrument and craft parts
- Decorative and protective clear coats
